

# Using OneDrive with Garage Band on an iPad

Using OneDrive, you can store your Garage Band sound files on the cloud

1. Once you have created your file, go the “My Songs” area. Hold your finger on the song you wish to save until it expands and begins wiggling.
2. Click now on the Share Arrow
3. When you are prompted to save your file, you can click on the **Open In** icon
4. Click on the **Share** link.
5. Choose **Open In OneDrive for Business**.
6. You may be asked to login to OneDrive on the iPad. Use **userid@limestoneschools.ca** for the Microsoft screen. Then use your AD login for the LDSB screen.
7. Choose **Upload to OneDrive for Business** at the bottom of the screen.

This exports your song in an m4a format to your OneDrive file.
